SHELTON IN SENATE DISTRICT 10 RACE

FORT WORTH – Dr. Mark Shelton, a respected Fort Worth physician and former member of the Texas House of Representatives, has reaffirmed his candidacy for Texas Senate District 10.

“I am running to bring experienced, conservative leadership to the people of Tarrant County. Families in Tarrant County deserve a true conservative representing them in Austin—someone with a proven track record of getting results.”

During his previous time in the House of Representatives, Dr. Shelton served on the Appropriations Committee and Public Education Committee, positions that enabled him to lead the effort to pass two balanced State budgets without raising taxes. He championed small business and economic growth, increased financial accountability in the education system, and removed unfunded mandates to allow schools to spend tax dollars more efficiently. As a committed pro-life State Representative, Dr. Shelton authored legislation focusing on improvements in healthcare for women, decreasing infant mortality rates, and fighting waste in the Medicaid system. Dr. Shelton is proud of his record as a vocal advocate for 2nd Amendment rights.

“Whether in private practice or public service, I have worked hard to make sure that families in my community receive the care and concern they have come to expect from me. As your next State Senator, I look to help build an economic environment where small businesses can prosper, where hard working citizens can find the work they need, and where our children can have opportunities for real success after High School. ”

Dr. Shelton is a graduate of Arlington’s Lamar High School, Baylor University and Texas A&M University College of Medicine. As a community pediatrician, he has treated sick children at Cook Children’ Health Care System since 1988. Mark and Mary Ann – his wife of 31 years – have 4 children.
